

Worksheet: Environment and Sustainable Development

NIOS · Class 11 · Economics · 3 questions · 13 marks

Name: _____

Date: _____

Score: _____ / 13

Q1. State the Brundtland Commission's definition of sustainable development. Using this definition, explain why building a large dam that displaces 50,000 tribal people and submerges a forest may not be 'sustainable development.' [3 marks]

Q2. A paper mill on the Cauvery River discharges untreated effluents. Its private production cost is ₹50 per tonne of paper. However, downstream farmers lose ₹20 per tonne worth of irrigation water quality, and fishermen lose ₹15 per tonne in fish catch. (a) Calculate the social cost per tonne. (b) What is the externality? (c) What policy can internalise this externality? [4 marks]

Q3. Describe India's four major environmental problems. For each, explain the economic cause and suggest one specific policy solution used by India. [6 marks]
